

# Cytaglobal Data Products

From East to West  
we keep you in touch

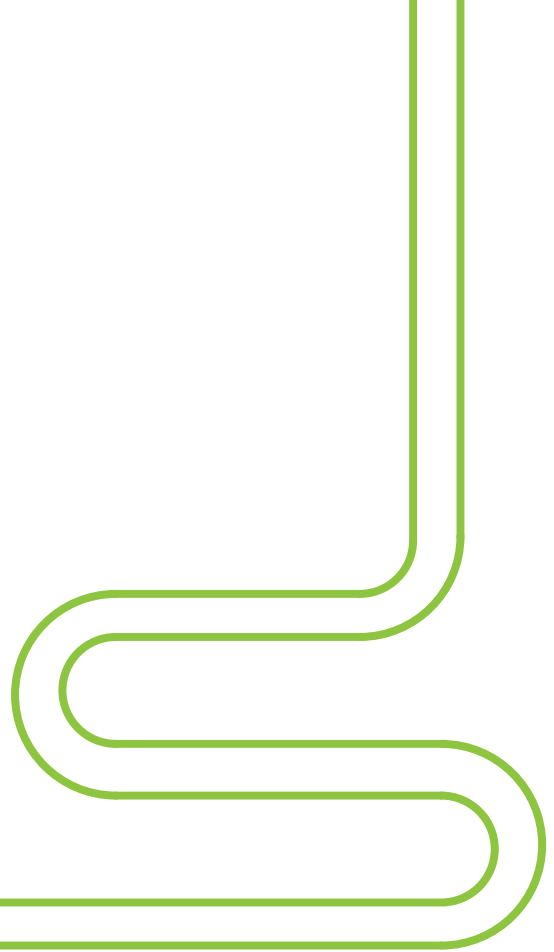

# Data Products

The Portfolio has been designed to satisfy the business needs of corporate and wholesale customers for global data connectivity, by providing high quality end-to-end solutions.

## Ethernet Connections (EthernetConnect & EthernetLink)

---

EthernetConnect and EthernetLink are E-line services provided over Cyta's international MPLS and WDM/SDH networks for data rates 2 Mbps to 10 Gbps. These services combine the reliability of traditional leased lines with the simplicity and scalability of Ethernet, and benefit from Cyta's fully secured and redundant backbone networks.

## SDH connections (BusinessLink)

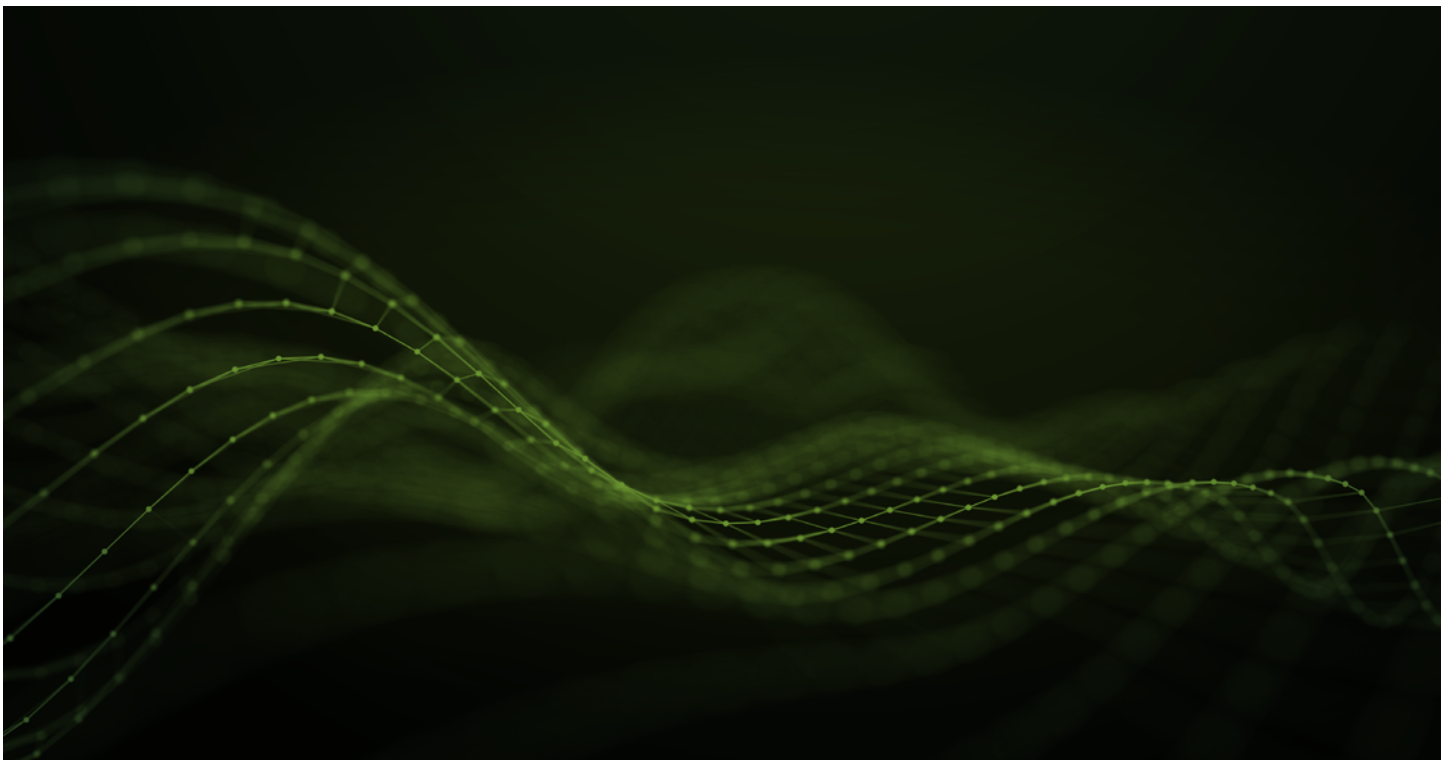

---

BusinessLink is a traditional International Private Leased Circuit (IPLC) solution provided over Cyta's WDM/SDH networks for data rates E1 to STM-64. These point-to-point circuits connect two customers' sites in Cyprus and abroad, ensuring dedicated, secure and reliable transfer of data.

## IP/MPLS VPNs (BusinessConnect)

---

BusinessConnect is a low cost IP-VPN solution provided over Cyta's international MPLS network which utilizes common integrated broadband infrastructure and can be used for voice, video and data applications.

# Highlights

## Technical Expertise & Personal Support

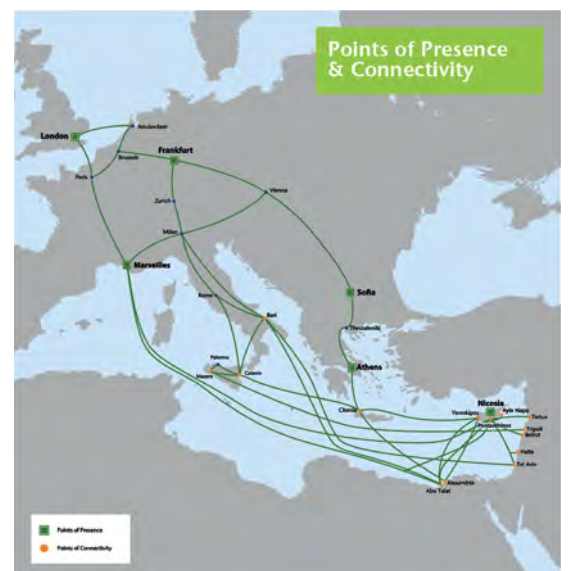

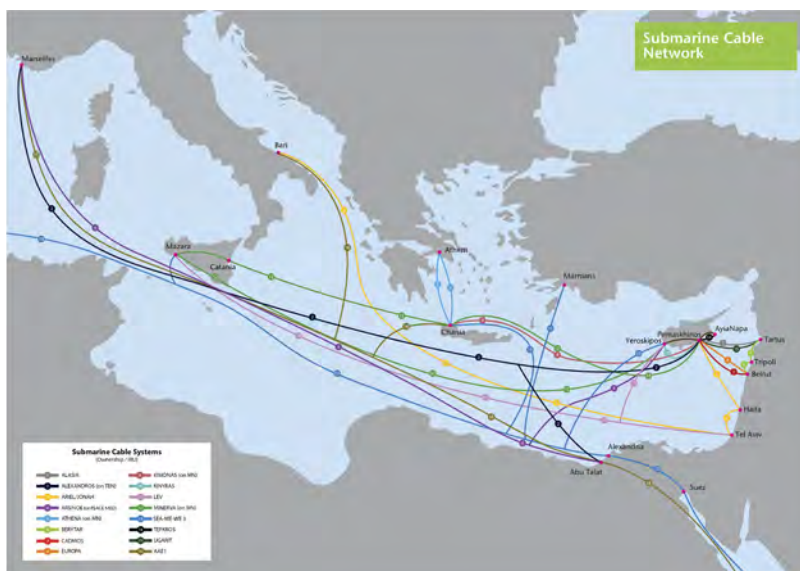

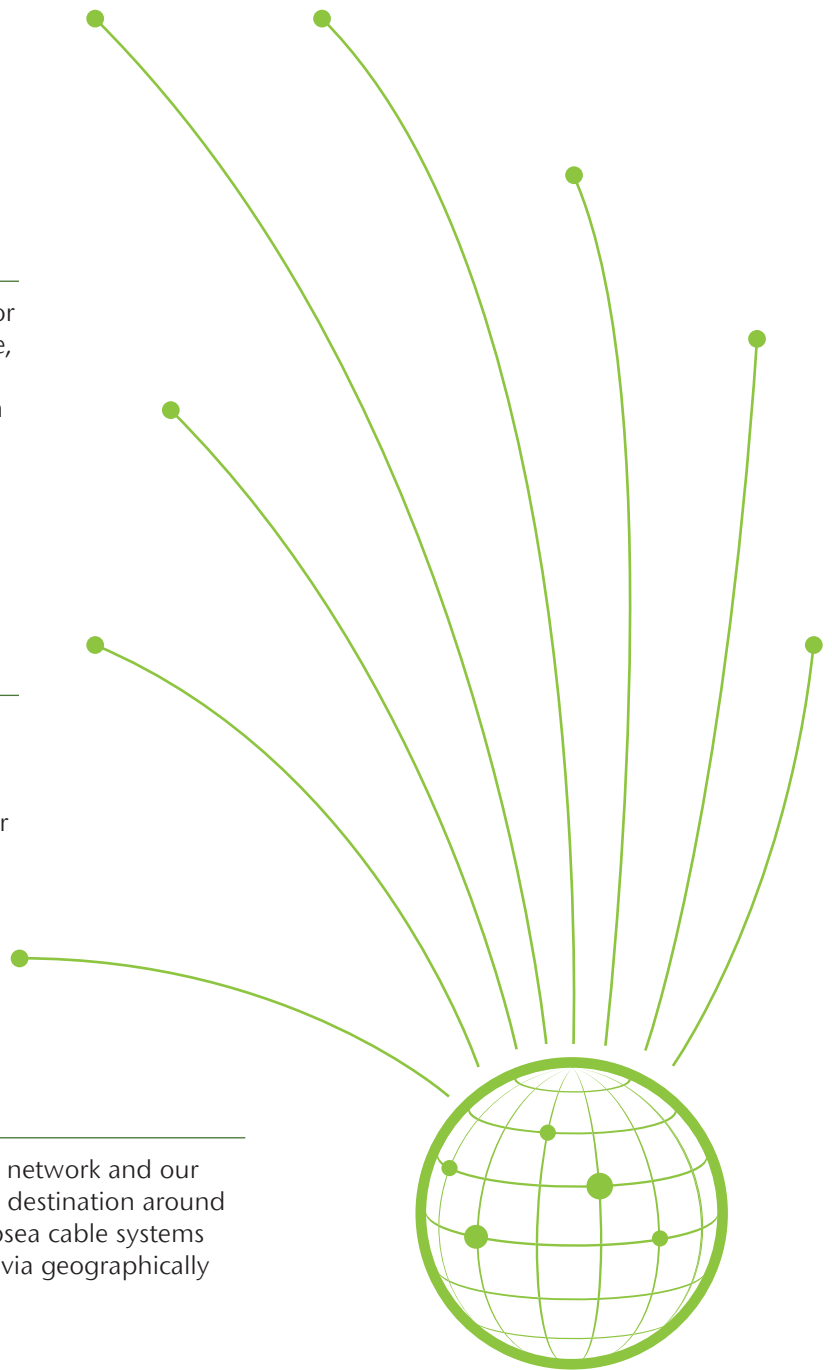

We are in the telecommunication business for more than 60 years. We have the knowledge, experience and expertise to support your telecommunications needs. With us, you can enjoy 24x7 support and personalized service through your own account manager.

## High Performance

We strive to offer you the best performance and service you can get. Our high level of service is recognized internationally and has received several awards and distinctions. Our services can be provided over protected or restorable international facilities, further enhancing reliability and performance.

## Global Reach

Through our own global telecommunication network and our partners' networks, we can reach almost any destination around the world. Cyta owns or co-owns several subsea cable systems and has the ability to offer network diversity via geographically separated cable landing stations in Cyprus.

# About Us

**Cyta**, the leading telecommunications provider in Cyprus, provides the full spectrum of advanced telecommunication products and services, which include fixed and mobile voice and data communications, value added services and much more.

**Cytaglobal**, a Strategic Business Unit of Cyta, manages Cyta's International Wholesale Market activities. Through its global network, Cytaglobal provides a wide range of international telecommunications products, services and integrated solutions, making Cyprus a major telecommunications hub in the Eastern Mediterranean and a telecommunications bridge between East and West.
